Fumigation

Get rid of your stock insects in a fast and 100% effective way?

Fumico has many years of experience fumigating among other products grains, cocoa, rice, coffee, tea, maize, soya, tobacco, wooden products and so on.

A few of our fumigation treatments in the food industry:

- ✓ **Shipping containers**
- ✓ **Barges, (sea)ships and lighters**
- ✓ **Silos, empty grain mills and factories**
- ✓ **Buildings and storage facilities**
- ✓ **Garbage trucks and trucks in general**
- ✓ **Residential buildings and mills**
- ✓ **Monumental buildings and museum objects**

Heat Treatments (ISPM-15)

In wooden packaging materials like pallets, dunnage, crates and wooden boxes, wood destroying insects may be present. Fumico offers heat treatment solutions, in compliance with ISPM-15 regulations.

In Numansdorp Fumico has several Heat Treatment chambers at her disposal, suitable for complete containers up to 45 ft (no loading / unloading of goods necessary).

Low Oxygen

100% elimination of insects by creating a low oxygen environment. Through Controlled Atmosphere treatment all your goods will be treated in one or more treatment chambers in Numansdorp, where a low oxygen level is established.

Individual pallets and big bags as well as complete containers up to 45 ft (per treatment chamber) can be handled.

A Modified Atmosphere solution is a treatment on location, rodents (black and brown rats and mice) will be eliminated in your sheds or buildings by creating a low oxygen environment.
